

Aditya M. Kulkarni

Technical Project Manager | Agile Delivery | Healthcare & Data Systems
Omaha, NE | adityamkulkarni@gmail.com | 402-708-4249

PROFESSIONAL SUMMARY

Technical Project Manager with 13+ years of experience delivering complex, cross-functional programs in healthcare and data-driven environments. Proven ability to manage multimillion-dollar initiatives, optimize processes, and drive on-time delivery across technical and non-technical teams.

Expert in Agile delivery, stakeholder alignment, and data-driven decision-making, with experience translating complex technical requirements into measurable business outcomes in regulated and high-impact environments.

KEY SKILLS

- Agile / Scrum Project Delivery
 - Program & Stakeholder Management
 - Budgeting & Resource Planning
 - Process Optimization & Workflow Automation
 - Data Analysis (R, MATLAB, Power BI)
 - Jira, SharePoint, Git
 - Cloud Fundamentals (AWS / Azure)
-

PROFESSIONAL EXPERIENCE

Consultant – Technical Project Delivery (Healthcare Systems)

Northwestern University | Chicago, IL

Feb 2026 – Present

- Led delivery of multiple data-driven programs, coordinating cross-functional stakeholders and improving execution efficiency and reporting visibility
 - Managed project plans, timelines, and risk mitigation, ensuring consistent on-time delivery
 - Implemented Agile workflows to improve execution speed and team coordination
 - Streamlined data tracking and reporting processes, improving visibility and decision-making
 - Translated technical requirements into clear execution plans and measurable outcomes
-

Research Project Manager

Boys Town National Research Hospital | Omaha, NE

Feb 2018 – Feb 2026

- Led delivery of 10+ concurrent cross-functional programs, managing teams of 5–15 stakeholders and aligning execution with organizational priorities
- Managed \$500K–\$1M+ portfolio of federally funded programs, ensuring budget control, regulatory compliance, and successful delivery outcomes
- Drove Agile transformation across programs, reducing delivery timelines by 20–30% and improving predictability and stakeholder visibility
- Established standardized project tracking and reporting systems, increasing transparency across stakeholders

- Developed data pipelines and reporting frameworks, improving efficiency and decision-making
 - Defined program execution strategy, prioritizing initiatives based on impact, resource constraints, and stakeholder needs
 - Served as primary liaison between leadership and technical teams, aligning execution with strategic objectives
-

Cochlear Implant Research Technician

Boys Town National Research Hospital

Jan 2014 – Jan 2018

- Coordinated execution of research studies and data workflows across multiple concurrent initiatives
 - Automated data visualization and reporting processes, reducing manual effort by ~25%
 - Contributed to grant-funded projects, supporting proposal development and execution
 - Partnered with cross-functional teams to improve operational efficiency
-

Earlier Roles

- Supported execution of cross-functional programs and optimized data processing workflows
 - Improved analysis efficiency and reporting consistency
-
